CYBERSPACE RESEARCH WORKSHOP

The Center for Secure Cyberspace (CSC), a collaborative effort of Louisiana Tech University and Louisiana State University, announces the upcoming 3rd Cyberspace Research Workshop (CRW'10). This event will be held on 15 November 2010 in conjunction with the Air Force Global Strike Command Technology and Innovation Symposium at the Shreveport Convention Center in Bossier City-Shreveport, LA. The workshop will provide a venue to discuss emerging technologies, share ideas and create opportunities for researchers and practitioners in various areas of cyber security.

Theme:

This year, the theme of the workshop centers on security in a cyber-centric world where cohabitation with malware is presumptive. Cyberspace is increasingly becoming more mainstream and an active part of our lives. It is fraught with risk particularly due to the explosion of malware and other malicious entities. While much research attempts to address security within cyberspace, it is incumbent upon us to also consider an environment where people and malware cohabit. The purpose of CRW'10 is to engage in discussions that address cyber security in such an environment by analyzing problems and finding solutions in a wide range of relevant areas.

Topics (including but not limited to):

- Strategic Cyber Defense
- Global Cyber Situational Understanding
- Malware & Anti-Malware Technologies
- Coping with Malware
- Information Security & Assurance
- Information Warfare
- Cyberspace & the Human Element

Participants are invited to submit full papers (5-10 pages) and extended abstracts (4 pages) by 1 November 2010. Registration and full submission instructions are located at: http://csc.latech.edu/crw10.

This year, submissions will be made through EasyChair. Our conference is located at: http://www.easychair.org/conferences/?conf=crw10.

More information about the AFGSC Technology and Innovation Symposium can be found at: http://www.cyberinnovationcenter.org/symposium.

Call for Papers

Due by November 1

GENERAL CHAIR	CONFERENCE CHAIR	TPC CHAIRS
Lt. Gen. Robert J. Elder, USAF, Ret.	Les Guice	Vir V. Phoha S. S. Iyengar

Publication and Proceedings Chairs	Publicity Chairs for Announcement & Web	Local Arrangement Chair
Jean Gourd Vir V. Phoha	Christian Duncan Jean Gourd	Brenda Brooks

Schedule of Events

November 15-17, 2010
Shreveport Convention Center

Monday, 11.15

Cyberspace Research Workshop

For information and registration, please visit: http://csc.latech.edu/crw10.

Tuesday, 11.16-Wednesday, 11.17

Air Force Global Strike Command Technology and Innovation Symposium

The Cyber Innovation Center (CIC) and Air Force Global Strike Command (AFGSC) will co-host the first AFGSC Technology and Innovation Symposium. The Symposium is being held in conjunction with AFGSC's Global Strike Challenge and is an opportunity to develop relationships and exchange ideas with Industry and Academia that support the Air Force's newest Command.

CYBERSPACE RESEARCH WORKSHOP

GENERAL CHAIR

Lt. Gen. Robert J. Elder, USAF, Ret.

Conference Chair

Les Guice

Publication and Proceedings Chairs

Jean Gourd
Vir V. Phoha

Publicity Chairs for Announcement & Web

Christian Duncan
Jean Gourd

Local Arrangement Chair

Brenda Brooks

TECHNICAL PROGRAM COMMITTEE

V. V. Phoha, Chair	S. S. Iyengar, Chair
D. Ali	G. Allen
T. Atkison	K. Balagani
S. Dua	C. Duncan
